### 3.4 Interest rate and currency risks

Interest rate risk	strategy, limits, counterparties etc (if applicable)
	Les conditions de fonctionnement d'Arkea Home Loans SFH ne l'exposent pas à un risque de taux.
	En mode de fonctionnement normal (c'est à dire tant que Crédit Mutuel Arkéa n'est pas en défaut au titre de ses Actifs Eligibles), Arkea Home Loans SFH n'est pas exposé à un quelconque risque de taux dans la mesure où les emprunts, par émissions d'Obligations à l'Habitat, et les prêts consentis par Arkea Home Loans SFH à Crédit Mutuel Arkéa sont parfaitement adossés en notionnel, en taux, en maturité, en devise. Du fait de cet adossement, aucun swap n'est mis en place au niveau d'Arkea Home Loans SFH.
	Nominal WAL
Internal	0 0
External	0 0
Currency risk	
	Comme pour le risque de taux, les conditions de fonctionnement d'Arkea Home Loans SFH ne l'exposent pas à un risque de change.  Par ailleurs, les émissions et les crédits du pool partagent la même devise (Euro).

### Group level information, senior unsecured ratings and covered bond issuer overview

1.2 Ratings of the parent company of the group in which the CB issuer is consolidated.

1.3 Covered bond issuer ratings
The rating agencies' methodologies ususally take the senior unsecured rating of a covered bond issuer's parent company as a starting point for their assessment of the credit risk of covered bonds. However, instead of refering to the parent company rating, some rating agencies may issue a "covered bond issuer rating" which is an assessment of the credit quality of a CB issuer's credit quality on an unsecured basis. Generally, a "covered bond issuer rating" is the same as the senior unsecured rating of the CB issuer's parent company although it may be different in some specific cases.

If no "CB issuer rating" has been granted to the CB issuer, "NA" should be indicated.

### 2.1 Covered bond issuer

### 2.2 Covered bonds and cover pool

### Guaranteed loans or mortgage promissory notes :

Guaranteed loans or morgage promissory notes:
If the eligible assets are transfered into the cover pool using guaranteed loans (i.e. collateral directive framework) or mortgage promissory notes, the outstanding amount of the eligible assets pledged as collateral of the notes or loans should be indicated instead of the amount of the guaranteed loans.

Asset backed securities:
If eligible asset backed securities are included in the cover pool, the explanations to the reporting should specify whether the information is provided using a look through approach (i.e. underlying assets) or if the outstanding amount of ABS securities held is indicated.

"Of which assets eligible to CB refinancing":
The outstanding amount of eligible assets including replacement assets shall be filled in.
The eligible amounts only take into account assets which fulfill the legal eligibility criteria to the cover pool.
For residential loans, the eligible amounts are limited to 80% of the value of the pledged property for mortgage loans or of the financed property for guaranteed loans. The legal coverage ratio's weightings of eligible assets are not taken into account in this calculation (e.g. a loan guaranteed by an eligible guarantor with an LTV level below the 80% / 60% cap is entered for 100% of its outstanding amount regardless of the guarantor's rating).

### 2.3 Overcollateralisation ratio

Each issuer shall explain calculation methodology for each OC ratio

- all amounts shall be indicated after taking into account the cover pool's interest rate or currency swaps.

The legislation requires that the calculation of the legal coverage ratio be audited semi-annually within a period of three months following the calculation date. As a consequence, the current ratio is provisionnal / unaudited when the report is published. The last audited ratio is provided as an additional information.

Rating agencies : Minimum OC Issuers shall disclose the highest minimum OC requirement

<u>Contractual maturities:</u>
Contractual maturities are calculated assuming a zero prepayment scenario on the cover pool assets. Commendation maximizes alle calculated assuming a zero prepayment scenario off the cover poor diseases. For pass through ABS, this assumption is applied to the underlying assets to determine the contractual maturity of the ABS (i.e. contractual maturity is not calculated according to the legal final maturity of the securities).

Expected maturities:
The assumptions underlying the calculation of the expected WAL and expected maturity breakdown shall be disclosed for each element of the cover pool including substitute assets. Some information should be provided to explain the prepayment assumptions on assets and liabilities. For substitute assets, it should be explained if these assumptions include asset sales or repo.

Outstanding
The nominal value of liquid assets shall be reported

<u>Liquidity support</u> Provide details on the nature of liquidity support.

### Substitution assets

Details of the information provided shall be given in the case of split ratings.

### Residential cover nool data

4 Explain for each table which information is included or not included (e.g. external RMBS assets excluded)

The assets backing guaranteed loans (collateral directive framework), mortgage promissory notes and internal ABS shall be disclosed using a look through approach in each table.

4.2, 4.3 Geographical distribution / regional breakdown
The geographical breakdown of assets shall take into account the location of the pledged property for residential mortgages and the location of the property which is refinanced by the loan in the case of guaranteed loans. List can be extended by individual issuers where applicable

Unindexed current LTV
Unindexed LTV is calculated on the basis of the current outstanding amount of the loans and the initial valuation / price of the residential assets.

### 4.5 Indexed current LTV

Indexed LTV is calculated on the basis of the current outstanding amount of the loans to the appraised values or prices of the residential assets using an indexation methodology. Details of the indexation methodology shall be provided.

Mortgages and guarantees
 Provide a breakdown by guarantee regime in the case of state guarantees

### 4.10 Interest rate type

<u>"Floating"</u> includes loans with with interest rate reset periods exceeding one year (e.g. loan indexed on CMS 5Y with an interest rate reset every five years)

"Mixed" shall be used for loans with a combination of fixed, capped or floating periods (e.g. 10 years initial fixed rate switching to floating)

### Public sector cover pool data

5 Explain for each table which information is included or not included
