# 1. Capital

Regulation (EU) No 2024/1623 of the European Parliament and of the Council of 31 May 2024 (CRR3) provides, as of 1 January 2025, new provisions relating to capital requirements; the tables below are revised accordingly.

### 1.1. Composition of the capital

Regulatory capital has been determined in accordance with Part II of the CRR, and supplemented by technical standards (delegated and EU implementing regulations of the European Commission).

### Capital includes:

- Tier 1 capital, comprising Common Equity Tier 1 (hereinafter "CET1") capital net of deductions and Additional Tier 1 (hereinafter "AT1") capital net of deductions;
- Tier 2 (hereinafter "**T2**") capital net of deductions.

### Table 1 (EU CC1): Composition of regulatory own funds

|       | In € thousands                                                                                                                                                                                                                                                                    | Amounts as at 06.30.2025 | Source based on reference<br>numbers/letters of the<br>balance sheet under the<br>regulatory scope of<br>consolidation |
|-------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|------------------------------------------------------------------------------------------------------------------------|
|       | Common Equity Tier 1 (CET1) capital: instruments and reserves                                                                                                                                                                                                                     |                          |                                                                                                                        |
| 1     | Capital instruments and the related share premium accounts                                                                                                                                                                                                                        | 3,118,430                | (h)                                                                                                                    |
|       | of which: Shares                                                                                                                                                                                                                                                                  | 3,112,991                |                                                                                                                        |
|       | of which: Additional paid-in capital                                                                                                                                                                                                                                              | 5,439                    |                                                                                                                        |
| 2     | Retained earnings                                                                                                                                                                                                                                                                 | 7,048,523                | (i) (j)                                                                                                                |
| 3     | Accumulated other comprehensive income (and other reserves)                                                                                                                                                                                                                       | -230,946                 | (j)                                                                                                                    |
| EU-3a | Funds for general banking risk                                                                                                                                                                                                                                                    | -                        |                                                                                                                        |
| 4     | Amount of qualifying items referred to in Article 484 (3) CRR and the related share premium accounts subject to phase out from CET1                                                                                                                                               | -                        |                                                                                                                        |
| 5     | Minority interests (amount allowed in consolidated CET1)                                                                                                                                                                                                                          | -                        |                                                                                                                        |

# 1.2. Capital requirements

The capital requirements shown below and in the following sections are the minimum requirements, corresponding to a level of 8% of risk-weighted assets.

As France has activated the national option to apply the output floor at the highest level of consolidation, the Crédit Mutuel Arkéa Group is not prudentially subject to an output floor calculation, which applies only to Crédit Mutuel Group.

Consequently, the following tables are not displayed in the Crédit Mutuel Arkéa Group's Pillar 3 report:

- EU CMS1: Comparison of modelled and standardised risk weighted exposure amounts at risk level;
- EU CMS2: Comparison of modelled and standardised risk weighted exposure amounts for credit risk at asset class level.

Table 3 (EU OV1): Overview of risk weighted exposure amounts

|        |                                                                          | а               | b            | С                               |

(2) Not integrating the interim result

(4) Taking into account possible AT1 deficits

The Crédit Mutuel Arkéa group has to comply with additional capital requirements, as follows:

- a conservation buffer which is mandatory for all establishments;
- a countercyclical capital buffer corresponding to the weighted average of the countercyclical buffer rates that apply in the countries that correspond to the Group's main credit exposures. The countercyclical buffer, which is designed to protect banks from excessive growth in credit (in particular a deviation from the ratio of credit to gross domestic product), is imposed at the discretion of the designated authority of each jurisdiction, applicable to all exposures that establishments have in this jurisdiction. In France, the countercyclical buffer is set by the French financial stability authority (Haut Conseil de Stabilité Financière), hereinafter referred to as the "HCSF". Since January 2024, the countercyclical buffer rate has been set at 1% of risk-weighted assets on French exposures. The mandatory recognition of countercyclical capital buffer rates implemented in other states was capped at 2.5%. Beyond this cap, rates require the explicit recognition of the HCSF.

Table 5 (EU CCyB1): Geographical distribution of credit exposures relevant for the calculation of the countercyclical buffer

### Table 6 (EU CCyB2): Amount of institution-specific countercyclical capital buffer

|   | In € thousands                                                  | 06.30.2025 |
|---|-----------------------------------------------------------------|------------|
| 1 | Total risk exposure amount                                      | 48,901,272 |
| 2 | Institution specific countercyclical capital buffer rate (in %) | 0.9956%    |
| 3 | Institution specific countercyclical capital buffer requirement | 486,844    |

### 2.2. Leverage ratio

The procedures for monitoring the risk of excessive leverage have been approved by Crédit Mutuel Arkéa's Board of Directors and the ALM and Capital Management Committee. They are designed around the following:

- the leverage ratio, which is one of the key solvency indicators and is therefore the focus of particular attention;
- the setting of an internal limit, which is also governed by warning and recovery thresholds:
- a specific procedure has been established for any breaches of the limit set by the Board of Directors, which involves the General Management and Crédit Mutuel Arkéa's Board of Directors.

The CRR regulation defined a ratio aimed at measuring the leverage effect. The leverage ratio is intended both to calibrate the amount of Tier 1 capital (numerator of the ratio) and to control the Group's leverage exposure (denominator of the ratio) in order to achieve the ratio level targets set by the Group.

The leverage ratio is subject to a public disclosure requirement by banks and has been subject to a minimum requirement set at 3% since the closing of June 30, 2022.

### Table 7 (EU LR1 - LRSum): Summary reconciliation of accounting assets and leverage ratio exposures

|     | As at 06.30.2025<br>In € thousands                                                                                                                                                                                 | Applicable amount |
|-----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| 1   | Total assets as per published financial statements                                                                                                                                                                 | 199,830,604       |
| 2   | Adjustment for entities which are consolidated for accounting purposes but are outside the scope of prudential consolidation                                                                                       | -59,708,267       |
| 3   | (Adjustment for securitised exposures that meet the operational requirements for the recognition of risk transference)                                                                                             | 0                 |
| 4   | (Adjustment for temporary exemption of exposures to central banks (if applicable))                                                                                                                                 | 0                 |
| 5   | (Adjustment for fiduciary assets recognised on the balance sheet pursuant to the applicable accounting framework but excluded from the total exposure measure in accordance with point (i) of Article 429a(1) CRR) | 0                 |
| 6   | Adjustment for regular-way purchases and sales of financial assets subject to trade date accounting                                                                                                                | 0                 |
| 7   | Adjustment for eligible cash pooling transactions                                                                                                                                                                  | 0                 |
| 8   | Adjustment for derivative financial instruments                                                                                                                                                                    | -2,580,697        |
| 9   | Adjustment for securities financing transactions (SFTs)                                                                                                                                                            | 9,768,413         |
| 10  | Adjustment for off-balance sheet items (ie conversion to credit equivalent amounts of off-balance sheet exposures)                                                                                                 | 6,430,698         |
| 11  | (Adjustment for prudent valuation adjustments and specific and general provisions which have reduced Tier 1 capital)                                                                                               | 0                 |
| 11a | (Adjustment for exposures excluded from the total exposure measure in accordance with point (c) of Article 429a(1) CRR)                                                                                            | -1,506,870        |
| 11b | (Adjustment for exposures excluded from the total exposure measure in accordance with point (j) of Article 429a(1) CRR)                                                                                            | -10,846,703       |
| 12  | Other adjustments                                                                                                                                                                                                  | -1,190,093        |

### 3. Credit risk

Credit risk is one of the Crédit Mutuel Arkéa group's main risks.

### 3.1. Exposures

The Group uses its internal ratings system to calculate its regulatory capital requirements in respect of credit risk, following the authorization issued by the regulatory authorities:

- using the advanced method for the retail customer and the corporate portfolios, excluding large accounts;
- using the foundation method for large accounts and bank portfolios.

As part of the TRIM exercise (targeted review of internal models), the European Central Bank (hereinafter "ECB") confirmed the approvals obtained under the advanced internal ratings method for retail portfolios. As regards large accounts and banks, in application of the TRIM constraints imposing limitations on these portfolios, Crédit Mutuel has decided to switch to the foundation method at March 31, 2022, thus anticipating the "Basel 4" rules applicable as from January 1, 2025. These portfolios are in the process of taking into account relevant recommendations.

### Table 10 (EU CR1-A): Maturity of exposures

|   |                                    | а         | b          | С                      | d          | е                  | f           |

## 3.2. Credit quality of assets

### Non-performing exposures

A common definition of default has been adopted for Credit Mutuel. Based on the alignment of the prudential treatment with the accounting treatment (CRC 2002-03), this definition matches the Basel concept of loans in default and the accounting concept of non-performing loans and loans in litigation. The computer software factors in contagion, which means downgrading can be extended to include related outstandings. The controls carried out by the internal audit and by the statutory auditors ensure the reliability of the procedures for identifying defaults used to calculate capital requirements.

### Forbone exposures

Exposures are restructured as a result of the debtor's financial difficulties. This involves the Group making concessions to the debtor (changes in the contract terms such as the rate or term, partial waiver, additional financing that would not have been granted in the absence of such difficulties, etc.). The Crédit Mutuel Arkéa group has the means in its IT systems to identify restructured exposures in its performing and non-performing portfolios, which are defined using the principles set out by the EBA on October 23, 2013. Restructuring results, as a minimum, in a transfer to bucket 2.

Table 11 (EU CQ1): Credit quality of forborne exposures

|     |                                                          | а                      | b       | С                            | d                 | е                                                                | f                                   | g             | h                                                              |

<sup>(\*)</sup> The Crédit Mutuel Arkéa group applies local law and losses are not recognised until all recovery rights have expired.

### Table 16 (EU CR2): Changes in the stock of non-performing loans and advances

| In € thousands                                                      | Gross carrying amount |
|---------------------------------------------------------------------|-----------------------|
| Initial stock of non-performing loans and advances as at 12.31.2024 | 1,857,288             |
| Inflows to non-performing portfolios                                | 508,763               |
| Outflows from non-performing portfolios                             | -406,628              |
| Outflows due to write-offs                                          | -92,394               |
| Outflow due to other situations                                     | -314,234              |
| Final stock of non-performing loans and advances as at 06.30.2025   | 1,959,423             |

# 3.3. Standardised approach

Exposures dealt with under the standardised approach are set out in the following tables.

The Crédit Mutuel Arkéa group uses assessments by rating agencies recognized by the supervisor (external credit assessment institutions - ECAI) to measure the risk on exposures dealt with using the standard method. The ratings of Standard & Poor's, Moody's and Fitch are mainly used for exposures to institutions, governments and central banks. The valuations of the Banque de France are mainly used for exposures to companies.

The cross-reference table used to link the credit quality steps to the external ratings taken into consideration is that defined in the regulations.

### Table 17 (EU CR5): Standardised approach

## 3.4. Internal ratings-based approach

### Rating procedures and parameters

Rating algorithms and expert models have been developed to improve credit risk assessment within Crédit Mutuel and to comply with the regulatory requirements concerning internal ratings-based approaches.

The counterparty rating system is used throughout Crédit Mutuel.

The parameters used to calculate weighted risks (hereinafter "RWA") are national and apply to all Crédit Mutuel entities.

### Table 18 (EU CR6): IRB approach - Credit risk exposures by exposure class and PD range Advanced internal method

### Disclosure of specialised lending and equity exposures

The risk-weighted assets (RWAs) of specialized financing exposures are obtained using the slotting criteria method.

The risk-weighted assets (RWAs) of equity exposures are obtained using the simple risk-weighted approach, which involves applying specific risk weightings to the carrying amounts of the exposures.

The Crédit Mutuel Arkéa group has no exposure to specialized lending such as commodities finance. Consequently, the following table is not displayed in the Group's Pillar 3 report:

• EU CR10.4: Specialised lending - Commodities finance (Slotting approach).

### Table 20 (EU CR10.1): Specialised lending - Project finance (Slotting approach)

# 4. Counterparty credit risk

Counterparty credit risk corresponds to the risk incurred on:

- derivative instruments in the banking book and the trading book;
- repo transactions in the banking book.

For the Crédit Mutuel Arkéa group, counterparty credit risk is a small component of overall credit risk.

The Crédit Mutuel Arkéa group has no exposure to credit derivatives and does not apply the IMM approach for counterparty credit risk. Consequently, the following tables are not displayed in the Group's Pillar 3 report:

- EU CCR6: Credit derivatives exposures;
- EU CCR7: RWEA flow statements of CCR exposures under the IMM.

### Table 24 (EU CCR1): Analysis of CCR exposure by approach

### Disclosure of credit valuation adjustment

The Crédit Mutuel Arkéa group applies the reduced basic approach approach for credit valuation adjustment risk. Consequently, the following tables are not displayed in the Group's Pillar 3 report:

- EU CVA.2 : Credit valuation adjustment risk under the Full Basic Approach;
- EU CVA.3: Credit valuation adjustment risk under the Standardised Approach;
- EU CVA4: RWA flow statements of credit valuation adjustment risk under the Standardised Approach.

### Table 28 (EU CVA.1): Credit valuation adjustment under the Reduced Basic Approach

# 5. Credit risk mitigation techniques

Financial, personal and real collateral can be used directly to reduce the calculation of credit risk-related capital requirements that help to determine the calculation of the Group's solvency ratio. The use of collateral in risk mitigation techniques is, however, subject to compliance with eligibility conditions and minimum requirements imposed by regulations.

Table 29 (EU CR3): CRM techniques overview - Disclosure of the use of credit risk mitigation techniques

Outstandings measured using the standardised approach mainly concern:

- the categories comprising central and local governments and similar entities;
- mortgage lending by specialized subsidiaries;

### • equity exposures.

This type of counterparty or lending (except equities exposures) benefits from preferential weighting. There is no additional impact from the use of risk mitigation (CRM) techniques.

The Crédit Mutuel Arkéa group applies the advanced internal ratings-based method to most of its customer loans. As a result, collateral is mainly taken into account in the modeling of loss given default.

The Crédit Mutuel Arkéa group does not underwrite credit derivatives. Consequently, the following table is not displayed in the Group's Pillar 3 report:

EU CR7: IRB approach - Effect on the RWEAs of credit derivatives used as CRM techniques.

### Table 32 (EU CCR5): Composition of collateral for CCR exposures

### 6. Securitisation

At June 30, 2025, the Crédit Mutuel Arkéa group held, as an investor, a number of securitization positions in the Banking Book portfolio.

As Crédit Mutuel Arkéa acts as an investor, the following tables are not included in the Group's Pillar 3 report:

- EU SEC2: Securitisation exposures in the trading book;
- EU SEC3: Securitisation exposures in the non-trading book and associated regulatory capital requirements - institution acting as originator or as sponsor;
- EU SEC5: Exposures securitised by the institution exposures in default and specific credit risk adjustments.

### Table 33 (EU SEC1): Securitisation exposures in the non-trading book

# 7. Market risk

The Crédit Mutuel Arkéa group calculates its market risk capital requirements using the standardised approach.

At the end of June 2025, there is no market risk as the Crédit Mutuel Arkéa group has no portfolio in the trading book. Consequently, the following tables are not displayed in the Group's Pillar 3 report:

- EU MR1: Market risk under the standardised approach.
- EU MR2: Market risk under the alternative internal model approach (AIMA)
- EU MR3: Market risk under the simplified standardised approach (SSA)
- EU MR4: Comparison between VAR (1 day, 99%) and daily trading portfolio result

# 8. Interest rate risk in the banking book

Interest rate risk is then current or prospective risk, to which the bank's shareholders' capital and earnings are exposed as a result of unfavorable movements in interest rates. It can result from a difference in maturity between fixed-rate assets and liabilities, a difference in the reference index (basis risk) or the exercise of options (such as caps, floors or early repayment of loans).

Table 35 (EU IRRBB1): Interest rate risks of non-trading book activities

# 9. Liquidity risk

Liquidity risk is the risk that an entity will not be able to meet its obligations or to unwind or offset a position because of its situation or the market situation within a specified period of time and at a reasonable cost. It arises from a maturity mismatch between the sources and uses of funds.

It may result in an additional financial expense in the event of an increase in liquidity spreads; in the most extreme form, it could result in the institution's inability to honor its commitments.

The Group has historically been vigilant and prudent in managing this risk.

A number of regulatory liquidity ratios are closely monitored, including:

- the LCR (Liquidity Coverage Ratio), which is provided for by the CRD 4 and CRR regulations. It measures the ratio between liquid assets and net cash outflows at 30 days under a stress scenario. The minimum required level has been 100% since 2018:
- the NSFR (Net Stable Funding Ratio), which is also a liquidity ratio provided for by the CRD 4 and CRR regulations. It verifies the coverage of stable uses by stable resources. The minimum required level has been 100% since June 2021.

In addition to regulatory liquidity indicators, CM Arkéa has an advanced internal system for monitoring and controlling liquidity risk, which is overseen and managed by the ALM Department.

#### Short-term liquidity ratio information

In accordance with the CRR, the Crédit Mutuel Arkéa group's Accounting Department produces, and submits monthly to the ECB, a report on its short-term liquidity coverage ratio (hereinafter "LCR").

The purpose of the LCR is to ensure the short-term resilience of banks in the face of severe liquidity stress. It verifies that the level of highly-liquid assets is sufficient to cover the net cash flows over the next 30 days, under stress assumptions involving, in particular, deposit flight and drawdowns of amounts under off-balance sheet agreements.

### Explanations on the main drivers of LCR results, its changes over time and the evolution of the contribution of inputs to the LCR's calculation over time

The minimum required level of the LCR is set at 100% in 2025. The Group met the regulatory requirement throughout the second quarter of 2025 with significant room for maneuver. The average LCR from July 2024 to June 2025 was 141.91%. At the end of June 2025, the Group's consolidated LCR ratio was 149.40%, an increase of 7.79 points compared with the end of March 2025.

The Crédit Mutuel Arkéa group's liquid assets totaled €21,412 million and consisted mainly of deposits at central banks and level 1 guaranteed bonds. These represented 65% of liquid assets at the end of June 2025.

Net cash outflows over 30 days amounted to €17,141 million, most of which corresponded to customer deposits. This represented an increase of €663 million compared with the end of March 2025.

Net cash inflows over 30 days amounted to €2,809 million, most of which corresponded to customer loans and maturing debt securities. This represented an increase of €830 million compared with the end of March 2025.

The Crédit Mutuel Arkéa group calculates the LCR in accordance with Implementing Regulation (EU) 2024/3172.

#### Concentration of funding and liquidity sources

Crédit Mutuel Arkéa seeks to diversify its sources of funding and liquidity. It has therefore defined internal standards on :

- the loan-to-deposit ratio in order to check the balance of the commercial business and dependence on market refinancing;
- the level of dispersion of interbank refinancing in order to ensure control of its dependence on certain counterparties;
- refinancing volumes by maturity to avoid a concentration of the maturities of the refinancing lines.

At the same time, the Crédit Mutuel Arkéa group has developed a policy of diversifying its refinancing channels and has several types of issue vehicles, particularly in the medium to long term, with both unsecured and secured issuance programs.

The definition of the refinancing program takes into account these limits and the various possible issuance vehicles. When preparing for and carrying out issues in the markets, attention is also paid to the diversification of investors, both by type of investor (asset managers, banks, etc.) and by geographic area (France, Germany, Scandinavian countries, etc.).

### Description of the composition of the institution's liquidity buffer

Available liquidity reserves are a buffer in the event of a liquidity crisis.

They consist of cash that is available immediately (net of mandatory reserves) or in the short term (less than six months) and assets eligible for Central Bank refinancing available immediately or within three weeks (valued with the discount provided by the Central Bank). The level of liquidity reserves is set monthly by the Treasury, Refinancing and Foreign Exchange department and may, if necessary, be updated on a daily basis.

The liquidity reserves are presented monthly to the Group Operational ALM Committee in order of asset liquidity, with a comparison with past months, and quarterly to the ALM and Capital Management Committee and the Board of Directors as part of the limit monitoring process.

At June 30, 2025, the liquidity reserves amounted to €34.2 billion, an increase of €0.1 billion since March 31, 2025.

### Liquidity reserves

| In € billion                                              | 06.30.2025 | 03.31.2025 |
|-----------------------------------------------------------|------------|------------|
| Central bank deposits                                     | 6.4        | 6.7        |
| LCR securities eligible for the 3G pool (after haircut)   | 15.0       | 13.8       |
| Other assets eligible for the 3G pool (after haircut)     | 12.5       | 13.3       |
| Other assets not eligible for the 3G pool (after haircut) | 0.4        | 0.4        |
| Total                                                     | 34.2       | 34.1       |

Crédit Mutuel Arkéa strives to maintain liquidity reserves of more than nearly twice the amount of the net cash outflows of the LCR. This liquidity buffer allows it to cope with extreme crisis situations at all times and reflects the Group's commitment to prudent liquidity risk management. At June 30, 2025, liquidity reserves represented 39% of Crédit Mutuel Arkéa's gross deposits.

#### Exposure to derivatives and possible collateral calls

The Crédit Mutuel Arkéa group uses derivatives mainly for the purpose of managing interest rate risk. They are subject to margin calls that are generally standardised and meet the requirements of the European Market Infrastructure Regulation (EMIR).

At June 30, 2025, the net position of collateral calls was not material and had a marginal impact on cash and liquid securities management.

In addition, the calculation of the LCR includes an additional cash outflow corresponding to additional collateral requirements that would result from an adverse market scenario; the amount was valued at close to €699 million at June 30, 2025, which is not material in view of the amount of liquid assets.

#### Asymmetry of currencies in the LCR

The LCR is calculated in euros only, as foreign currency positions are marginal (foreign currency positions are valued in euros as they are below the 5% representativeness threshold in the total consolidated banking balance sheet). This is due to the group's business model and geographic location.

#### Information on net stable funding ratio

In addition to the LCR, European regulations provide for a long-term structural liquidity ratio called the "NSFR" (net stable funding ratio). The NSFR is designed to encourage credit institutions to have a permanent structure of stable resources, enabling them to continue operating over a period of one year in an environment of prolonged stress. The minimum required level of the NSFR has been 100% since June 2021 under the CRR.

The Group met the regulatory requirement in the first half of 2025, with significant room for maneuver. The average annual NSFR from July 2024 to June 2025 was 114.62%. At the end of June 2025, the NSFR ratio stood at 114.90%, a decrease of 1.21 points on the end of December 2024.

The amount of weighted liabilities available at one year was €94.993 million, most of which corresponded to customer deposits and issues (negotiable medium-term notes, negotiable certificates of deposit, etc.). This represented a decrease of €232 million compared with the end of December 2024.

The amount of weighted assets to be financed over one year was €82.676 million, most of which corresponded to loans to non-financial customers. This represented an increase of €664 million compared with the end of December 2024.

### Table 37 (EU LIQ2): Net stable funding ratio (NSFR)

### 10. FSG Risks

From a prudential perspective, for a financial institution, ESG (Environmental, Social, and Governance) risks correspond to the negative materialization of ESG factors on its financial situation, financial results, and cash flows due to impacts on its counterparties or assets.

ESG risks are potentially aggravating factors for other existing risks to which the Crédit Mutuel Arkéa group is exposed, including credit risk, operational risk, or other categories of financial risks. Therefore, Crédit Mutuel Arkéa has integrated ESG risk factors into its governance, strategy, and overall risk management framework.

In the absence of significant developments in qualitative information by the first half of 2025, the elements contained in the Pillar 3 report as of December 31, 2024, remain valid.

# 10.1 Quantitative information

<sup>\*</sup> In accordance with the Commission Delegated Regulation EU) 2020/1818 supplementing Regulation (EU) 2016/1011 as regards minimum standards for EU Climate Transition Benchmarks and EU Paris-aligned

Benchmarks -Climate Benchmark Standards Regulation - Recital 6: Sectors listed in Sections A to H and Section L of Annex I to Regulation (EC) No 1893/2006

To identify companies excluded from the Paris-aligned Benchmarks (PAB) indices, the Crédit Mutuel Arkéa group has chosen to rely on data provided by the Urgewald NGO, which draws up and updates two separate lists:

- the Global Coal Exit List (GCEL):
- the Global Oil & Gas Exit List (GOGEL).

Based on these lists, Crédit Mutuel Arkéa identifies companies excluded from the PAB indices whose revenue comes from activities related to coal (GCEL) and oil and gas (GOGFL).

For companies that generate at least 50% of their revenue from electricity production activities with greenhouse gas emission intensity exceeding 100g CO<sup>2</sup>e/kWh, exposures classified under NACE code D35.11 "Electricity production" have been analyzed to determine the source of the produced energy. Companies generating electricity from carbon-based sources (other than renewable energy or nuclear energy) are considered excluded from the PAB indices.

Based on its current knowledge, Crédit Mutuel Arkéa believes it does not have reliable information to identify exposures that would adversely affect one of the environmental objectives of the taxonomy. No information is published by counterparties that could potentially violate an environmental objective of the taxonomy. Consequently, this point could not be included in the analysis.

Finally, Crédit Mutuel Arkéa completes its analysis based on the information disclosed by companies in their sustainability report (CSRD), where they must specify whether they are included or excluded from the PAB indices.

According to this methodology, as of June 30, 2025, the total exposure of the Crédit Mutuel Arkéa group to companies excluded from the PAB indices amounts to €23.7 million (or 0.07% of the total gross accounting value of exposures by sector).

#### **GHG** financed emissions

Crédit Mutuel Arkéa has collected greenhouse gas emission data directly from corporate clients or from data providers. It should be noted that modeled data from data providers is not taken into account. Due to the challenges related to the availability and completeness of data on scopes 1 to 3, Crédit Mutuel Arkéa uses proxies when greenhouse gas emission data is not available. The PCAF (Partnership for Carbon Accounting Financials) accounting methodology is used, either based on revenue data or on the outstanding amounts and the sectoral proxies provided by PCAF.

The column C has not been filled out, in accordance with the EBA's no action letter of August 6, 2025.

Crédit Mutuel Arkéa collects data on energy performance certificates (EPC) from its clients. Efforts have been made to supplement this collection through the ADEME database, which records the EPCs carried out by diagnostics companies in France. All EPCs available to Crédit Mutuel Arkéa (direct collection and ADEME database) have been considered in this model, including EPCs that are over 10 years old.

For exposures for which Crédit Mutuel Arkéa only has the EPC label, a correspondence scale has been created to determine the associated energy consumption level (in kWh/m<sup>2</sup>) based on the median of the consumption scales per label.

For exposures for which Crédit Mutuel Arkéa has no EPC data, calculations are performed to estimate the energy consumption level (in kWh/m²). These calculations are based on a simple extrapolation aimed at applying to exposures with no EPC the breakdown obtained for exposures with EPC data, with a distinction between residential and commercial.

\*\*\* PiT distance to 2030 NZE2050 scenario in % (for each metric)

Crédit Mutuel Arkéa has set physical intensity targets for 2030 in certain high-emission sectors within its banking book (covering Crédit Mutuel Arkéa's financing and treasury investments).

Crédit Mutuel Arkéa based these targets on an analysis of GHG financed emissions using available data and metrics, as well as relevant scenarios to define and adopt these targets for 2030. When intensity data for issuers are not available in a metric and scope consistent with the group's commitment, estimates have been made internally to allow for data comparison.

The targeted sectors and activities are: Coal, Oil and Gas, Steel, Cement, Air Transport, Maritime Transport, Electricity Production, and Residential Real Estate.

Crédit Mutuel Arkéa has established two types of climate targets for 2030 :

- Targets regarding clients and/or counterparties: steel, cement, coal, oil and gas, aviation (airlines), maritime transport (freight transport), and electricity production sectors;
- Carbon intensity targets for certain financed projects: commercial aircraft, international freight transport vessels (over 5,000 tons), and residential real estate.

Regarding the objectives set for corporate clients and their assets (excluding residential real estate), they have been constructed based on data from the NZE 2050 scenario (Net Zero Emissions by 2050) from the International Energy Agency (IEA) for each relevant sector, aligned with the Paris Agreement aiming to limit global warming to 1.5°C. Crédit Mutuel Arkéa is therefore committed to ensuring that its banking and cash management portfolios in these sectors, concerning the defined scope for each sector, are aligned with the goals of the Paris Agreement by 2030.

#### Coal, Oil, and Gas

For several years, the group has voluntarily committed and adopted exit trajectories for the Coal and Oil and Gas sectors. These commitments are formalized in the sector policies published on the group's institutional website.

In this context, the group does not measure the physical intensity of its exposures in this sector but has established selection criteria for its financing and investment activities to achieve a total exit from the coal sector by the end of 2027 and a partial exit from the conventional and unconventional fossil energy sectors by the end of 2030. The criteria considered in these policies are compatible with the recommendations of the International Energy Agency: prohibition of financing new oil and gas projects to limit global warming to 1.5°C.

### Steel, Cement, Air Transport, Maritime Transport, Electricity Production, and Residential Real Estate

The analysis of GHG financed emissions, reference climate scenarios and the economic and regulatory trends in each sector enabled the definition of the following carbon intensity targets for 2030:

| Sector                  | Covered perimeter                                                                                   | Reference<br>scenario                   | Covered<br>Scopes | Carbon intensity target for 2030 |
|-------------------------|-----------------------------------------------------------------------------------------------------|-----------------------------------------|-------------------|----------------------------------|
| Residential real estate | 90% of the group's housing loan portfolio covered by the measure1                                   |                                         | scopes 1 and 2    | 1 12 KgC02 e/m2<br>funded/year   |

- 1 Scope of Crédit Mutuel de Bretagne and Crédit Mutuel du Sud-Ouest
- 2 Scope refocused on companies whose main activity is covered by the IEA scenario. Scope of financing from Crédit Mutuel de Bretagne, Crédit Mutuel du Sud-Ouest, Arkéa Crédit-Bail, Arkéa Banque Entreprises et Institutionnels and cash investments from Crédit Mutuel Arkéa
- 3 Scope refocused on companies whose core business is covered by the IEA scenario. Scope of financing from Crédit Mutuel de Bretagne, Crédit Mutuel du Sud-Ouest, Arkéa Crédit-Bail, Arkéa Banque Entreprises et Institutionnels and cash investments from the Crédit Mutuel Arkéa Trading Room
- 4 Scope of financing from Crédit Mutuel de Bretagne, Crédit Mutuel du Sud-Ouest, Arkéa Crédit-Bail, Arkéa Banque Entreprises et Institutionnels, Arkéa Banque Privée
- 5 Scope of Crédit Mutuel Arkéa's cash investments
- 6 Scope of financing from Crédit Mutuel de Bretagne, Crédit Mutuel du Sud-Ouest, Arkéa Crédit-Bail, Arkéa Banque Entreprises et Institutionnels
- 7 Scenarios adjusted according to the sector concerned

The air transport, maritime transport, and residential real estate sectors (out of Pillar 3 scope) are subject to dedicated sector policies published on the Crédit Mutuel Arkéa institutional website. These policies outline the group's strategy for supporting the environmental and societal transitions of these sectors, which are of significant importance to Crédit Mutuel Arkéa. These sector policies result from specific analyses and collaborative work to define the most appropriate support for each sector: the implementation of specific ESG criteria, creation of dedicated or adapted offers.

To achieve these decarbonization targets by 2030, Crédit Mutuel Arkéa will combine several levers:

- Selectivity in client and counterparty credits and treasury investments based on carbon intensity criteria specific to each sector;
- Support for client and counterparty financing projects in their decarbonization trajectory through adapted offers;
- Renunciation of certain financing and treasury investments incompatible with these objectives.

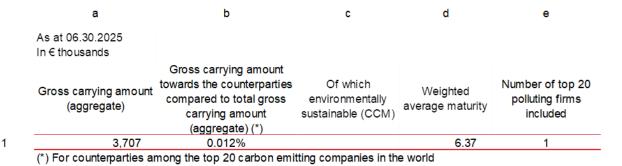

The template 3 published in this report presents the quantitative information related to the commitments made by Crédit Mutuel Arkéa and the related intensity measurements. In this context, the listed NACE codes are those concerned with sector commitments, and the published amounts correspond to the gross carrying amount of on-balance sheet exposures to companies within the identified NACE codes and within the group's commitments.

The alignment metrics published by sector are a calculation of the physical intensity of financed portfolios. The units are selected in coherence with the practices of targeted counterparties and the units used by the International Energy Agency in its scenarios.

The reference year is the date of the exposures for which an intensity metric was calculated. The calculated intensity of the portfolio may be based on counterparty intensity metrics that have been determined before the identification of the exposures.

The data on the distance to the IEA NZE 2050 scenario corresponds to the distance of the last reported metric from Crédit Mutuel Arkéa's commitment for the concerned sector. The data on targets represents the current intensity of the portfolio projected three years after linear measurement with respect to the 2030 commitment; this data is indicative and does not constitute a commitment within this timeframe.

Table 41 (Template 4): Banking book - Climate change transition risk: Exposures to top 20 carbon-intensive firms

To identify the top 20 carbon-intensive firms worldwide, the Crédit Mutuel Arkéa group

refers to the Carbon Majors list established by the Climate Accountability Institute, updated in 2024 and based on 2022 data (latest available data). This public list includes the scopes 1, 2 and 3 emissions estimated by this initiative.

Based on this list, as of June 30, 2025, only one company was identified in Crédit Mutuel Arkéa's banking portfolio, for a total amount of €3.7 million, i.e. 0.012% of the assets covered by the analysis. 100% of this amount is dedicated to financing the environmental transition and renewable energies.

The column C has not been filled out, in accordance with the EBA's no action letter of August 6, 2025.

Table 42 (Template 5): Climate change physical risk: Exposures subject to physical risk

To measure its exposures sensitive to acute and chronic physical risks, the Crédit Mutuel Arkéa group has developed an internal tool dedicated to the assessment and geographic measurement of physical climate risks at the municipality level (granularity: postal code) for metropolitan France.

As of June 30, 2025, the tool covers 12 climate-related hazards and relies on scientific databases for risk assessment and national (Géorisques, DRIAS) and international (PREPdata, Aqueduct) climate projections. Some hazards are based on statistical data regarding the likelihood of occurrence, while others incorporate a forward-looking dimension towards 2050 according to the SSP5-8.5 scenario from the IPCC.

The climate-related hazards considered in the assessment of acute risks are:

- floods:
- droughts;
- hail and snow storms:
- heatwaves:
- cold waves:
- frost waves.

The climate-related hazards considered in the assessment of chronic risks are:

- rising air temperatures;
- changes in rainfall patterns;
- sea level rise;
- changes in wind patterns;
- coastal erosion:
- water stress.

For each hazard, a five-level risk scale was applied, ranging from 0 (very low risk) to 4 (very high risk).

A score is determined for acute risks by giving the hazards an equal weighting and, for chronic risks, by reducing the weighting of the "rising sea levels" hazard due to its lower granularity and by eliminating it for non-coastal municipalities.

Exposures considered sensitive to acute and chronic physical risks and presented in this template are those located in French municipalities assessed as very high risk (level 4 = very high risk).

For exposures outside mainland France, the Group applies a level of country granularity, based on the ND-Gain Country Index, using a five-level risk scale. As exposures outside mainland France are insignificant, accounting for less than 3% of the Group's outstandings, the decision was made to disclose the data on an aggregate basis, without distinction between the various geographic regions.

### Templates 6 to 8: Green Asset Ratio (Taxonomy) and Template 10 (Other climate change mitigation measures not covered by Regulation (EU) 2020/852)

On 6 August 2025, the EBA issued a no-action letter regarding the application of ESG disclosure requirements.

In this letter, with the aim of reducing the operational burden on institutions, the EBA recommends the non-publication of information related to the Taxonomy (Templates 6 to 10 and Column C of Templates 1 and 4) reported in Pillar 3 reports, for the period starting from the reporting date of 30 June 2025 until the entry into force of the ITS (Implementing Technical Standards) amendments.

Crédit Mutuel Arkéa fully integrates ESG issues and risks into its strategy. To reaffirm its commitment to serving local communities and driving future transitions, Crédit Mutuel Arkéa adopted its corporate purpose ("Raison d'être") in 2020 and became a mission-driven company in 2022.

Thus, even though Taxonomy data are no longer subject to a publication requirement under ESG Pillar 3, they continue to be subject to rigorous and dedicated monitoring, in line with Crédit Mutuel Arkéa's sustainability ambitions and its corporate purpose.

Taxonomy data are also available in Crédit Mutuel Arkéa's Universal Registration Document and are updated annually.

## 11.1. Declaration of the responsible person

The information considered as proprietary is: the number of obligors broken-down by exposure class and PD range (article 452 g).

Decisions not to publish this information are taken in agreement with the Crédit Mutuel Arkéa group's management bodies.

### Person responsible for the information contained in this document

Elisabeth Quellec. Associate Chief Executive Officer of Crédit Mutuel Arkéa

### Declaration of the responsible person

I certify that the information contained in the Pillar 3 Report as of June 30, 2025 disclosing the information published under Part Eight of EU Regulation No. 575/2013 "CRR", as amended by the EU Regulation No 2024/1623 of the European Parliament and of the Council of 31 May 2024 (CRR3), is, to the best of my knowledge, in accordance with the formal policies and internal processes, systems and controls.

Done at Le Relecq Kerhuon, September 22, 2025.

Elisabeth Quellec, Associate Chief Executive Officer of Crédit Mutuel Arkéa
