Statement following the half-yearly update of the registration document

As it is practice in terms of financial information, Arkéa group updated its registration document following the approval of the half-yearly accounts. Considering the significant progress made on its independence project in the first half of 2018, the group has identified a list of theoretic risk factors, which might arise on this occasion. With regard to this unprecedented situation, the group has set up, in full transparency, the most possible exhaustive list of risks. This does not mean however that these risks will inevitably materialise.

This publication does not call into question the implementation of the independence project according to the timetable and to the organisation structure decided by the Board of Directors of ARKEA group.
